# GRADUATION PROJECT

Topic

HIGH-QUALITY PROGRAM OF ENGLISH – VIETNAMESE  
INFORMATION TECHNOLOGY

**Building a System for UTC ResearchHub  
"Project Management System"**

by

**LE DINH TU**

COURSE 62

CLASS 1

2021 - 2025 (Course 62)

**HANOI - JUNE 2025**

**UNIVERSITY OF TRANSPORT AND COMMUNICATIONS**  
**FACULTY OF INTERNATIONAL EDUCATION**

**GRADUATION PROJECT**

Submitted in partial fulfillment of the requirements for the  
degree of engineer

HIGH-QUALITY PROGRAM OF ENGLISH – VIETNAMESE  
INFORMATION TECHNOLOGY

by

**LE DINH TU**

Under supervision of      Dr(Msc) Luong Thai Le

Examiner of                      Dr.(Msc)

**HA NOI - JUNE 2025**

**REVIEWER**

# ACKNOWLEDGMENTS

I would like to extend my sincere gratitude to all faculty members at the University of Transport and Communications for their unwavering support and guidance throughout my academic journey. Their dedication to excellence in education has been instrumental in fostering an environment conducive to learning and intellectual growth.

I am particularly grateful to the instructors from the Faculty of International Education and affiliated departments. Their expertise, rigorous teaching, and willingness to share valuable insights have greatly enriched my academic experience and provided a solid foundation for my research endeavors.

My deepest appreciation goes to Ms. Luong Thai Le, my thesis advisor, whose insightful mentorship and meticulous guidance were critical to the successful completion of this project. Her clear direction and thoughtful feedback were invaluable in helping me understand the complex workflows and procedures of the university's graduation thesis defense process. Her continual support ensured that the system developed was well-aligned with the practical requirements of the academic environment.

I also wish to acknowledge the administrative staff and my peers, whose encouragement and assistance contributed positively throughout this process. Their collaboration and support helped create a productive and motivating atmosphere.

Finally, I am sincerely thankful to everyone who has contributed directly or indirectly to the realization of this thesis. This accomplishment reflects the collective efforts and encouragement of a supportive academic community, for which I am profoundly grateful.

Hanoi, June 3, 2025

# TABLE OF CONTENTS

INTRODUCTION .....	1
CHAPTER 1 OVERVIEW OF PROJECT .....	2
1.1 Introduction of the project .....	2
1.2 Survey of current solution .....	3
1.3 Overview of used tools of technologies .....	3
1.3.1 NextJS.....	3
1.3.2 NestJS .....	4
1.3.3 TypeScript and VS Code .....	6
1.3.4 PostgreSQL and Prisma.....	7
1.3.5 Conclusion .....	8
CHAPTER 2 REQUIREMENTS ANALYSIS AND SYSTEM DESIGN.....	9
2.1 Business analysis .....	9
2.1.1 Business requirements analysis .....	9
2.1.2 System requirements analysis.....	9
2.1.3 Role-permission matrix.....	10
2.1 System design.....	13
2.2.1 Use case diagram.....	13
2.2.2 Business function diagram .....	13
2.2.3 System architecture diagram .....	14
2.2.3 Sequence diagram .....	15
2.3 Database Design .....	17
2.3.1 Database table relations.....	17
2.3.2 Database description.....	20
2.3.3 Conclusion .....	39
CHAPTER 3 IMPLEMENTATION AND TESTING .....	39
3.1 Environment, tools, and directory structure .....	40
3.2 Main modules overview .....	40
3.2.1 Authentication.....	40

3.2.2	Selection.....	42
3.2.3	Proposal.....	45
3.2.4	Result .....	47
3.2.5	Evaluation .....	47
3.2.6	Dashboard .....	50
CONCLUSION .....		51
REFERENCES .....		53

# GLOSSARY

Term	Definition
API	Application Programming Interface: A set of protocols and tools for building software applications and enabling communication between different software components.
BFD	Business Function Diagram: A diagram that shows the hierarchical breakdown of business functions into simpler sub-functions. It helps visualize how complex tasks are divided based on the size and complexity of the system.
SD	Sequence Diagram: A type of UML (Unified Modeling Language) diagram that illustrates how objects interact in a particular sequence of events.
JWT	JSON Web Token: A compact, URL-safe means of representing claims to be transferred between two parties, commonly used for authentication and authorization.
RBAC	Role-Based Access Control: A method of regulating access to resources based on the roles assigned to users within an organization.
